

ALEX MERCER

Software Engineer — Python & Cloud

Boston, MA, USA | +1-555-0142 | alex.m@lab.net | github.com/alexmercer | linkedin.com/in/alexmercer

SUMMARY

Software engineer with 4+ years of experience building data-driven applications and cloud-native services. Skilled in Python and JavaScript across the stack, with hands-on AWS experience deploying and scaling production systems. Enjoys solving problems at the intersection of backend engineering and infrastructure.

SKILLS

Languages: Python, JavaScript, SQL
Cloud & Infra: AWS (EC2, S3, Lambda, RDS), Docker, Terraform, CI/CD
Frameworks: Django, Flask, Node.js, Express
Practices: REST APIs, Unit Testing, Agile/Scrum, Data Pipelines

EXPERIENCE

- Software Engineer — Vertex Analytics**

Jun 2022 – Present

 - Built and maintained Python microservices on AWS Lambda and EC2, processing 2M+ events daily.
 - Designed data pipelines with Python and SQL to support internal analytics dashboards used by 15+ teams.
 - Migrated deployment workflow to Docker and Terraform, reducing environment setup time by 60%.
 - Collaborated with frontend engineers on JavaScript-based internal tools to streamline reporting.
- Software Developer — Harborline Tech**

Aug 2020 – May 2022

 - Developed backend features in Python (Django) for a customer-facing SaaS platform.
 - Implemented AWS S3-based file processing pipeline, cutting manual data handling time by 70%.
 - Wrote unit and integration tests, increasing code coverage from 45% to 85%.
- Junior Developer — CodeNest Studio**

Jul 2019 – Jul 2020

 - Built internal tools in JavaScript and Python to automate repetitive QA workflows.
 - Assisted in migrating legacy scripts to a modern Python codebase.

EDUCATION

B.S. in Computer Science
Graduated 2019

Northeastern University, Boston, MA

CERTIFICATIONS

AWS Certified Developer – Associate | Python Institute PCAP
